

### **EHRLE** attributes

High pressure cleaner characteristics

Triplex-Piston-Pump Ceramic pump plunger, Stainless Steel pump valves and brass pump-head for long durability.

TSS-System with pump off delay During breaks longer than 90 seconds, the unit switches automatically to stand-by position. After opening the trigger-gun again, the unit is immediately ready for operation. The durability of the High-Pres sure Pump is also higher.

High-Pressure Chemical with Dosing-Valve Any cleaning-detergents can be applied during high-pressure stage by opening the Dosing-Valve. The High-Pressure Pump will absorb detergents together with water and pressurize it.

Information on recommended daily time of use.

Water-Break Tank for Separation No additional check unit Valve necessary -Machines conforms to Water-Board Re gulations. 30% increased Cleaning-Power due to no Chemical-Injector. Water-Break Tank help to protects pump from water starvation.

Patent Wheel-Brake (requirement by Law) with large rubberwheels - no small castors.

(Optional)

This professional Hose-Reel with stainless steel shaft is equipped with a folding handle doubling as a reel-brake. Up to 40m of High-Pressure Hose on the hose-re el ensure a wide action radius and easy storage.

#### EHRLE horizontal-heatcoil

with 3-pass System. Highest Efficiency – with environmentally fri endly low Emmissions! No additional insulation required - cold air is used to cool the Boiler. Separate Burner-Motor for professional use, ensures increased reliabilty.

#### 1400 U/min

All EHRLE High-Pressure Cleaners are equipped with slow-running, air-cooled and 4-pole electric Motors.

Total Switch off after 20min In case the Unit is not used in the stand-by mode for more than 20min it will switch off itself. The Unit can be re-started at the On/Off Switch for normal operation.

Leckage Recognition In the event of leaking parts in the High-Pressure Cleaner, or any Gun or Hose leaking, the Unit shuts itself down.

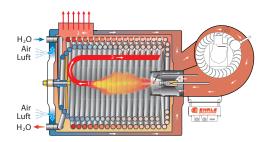

**Optical Flame-Monitor** on all High-Pressure Cleaners of Series ETRONIC II and static Units in order to comply with legal requirements.

The quick-coupling system by using the EHRLE QC315 quick-coupling system Accessories, Guns, Lances and Nozzles can be changed without the use of Tools. The EHRLE QC315 Guns incorpo rate an anti-twist Swivel for Hoses.

(Option) Water-Break Tank

Food appliance with abrasion resistant high pressure hose blue, self-supporting, robust, corrossions free, rotation-moulded device-chassis for food industry, stainless steel, impact-resistant device-cover made of ABS, triplex-piston pump with chrome, ni-ckel plated pump head (hot water resistant), high-performance ceramic piston, stainless-steel valves, leakage-return, start-stop			

device-chassis for food industry, stainless steel, impact-resistant device-cover made of ABS, triplex-piston pump with chrome, nickel plated pump head (hot water resistant), high-performance ceramic piston, stainless-steel valves, leakage-return, start-stop system with switch-off delay, total-switch-off after 20min, unloader safety-valve c/w Infinitely variable pressure and quantity regulation, 4 large rubber wheels for rough terrain, with a patented wheel brake 2-way, storage possibility for all accessories, robust rotary on-off switch, 7,5m connection cable, removable ergonomic drawbar stainless steel

#### High pressure cleaner Cold water, mobile, petrol operated - series KDB KDB940
